Re: Warning for the Group's Financial Results for 2024

In order to better inform shareholders and investors in general, Demetra Holdings Plc (the "Company", the "Group") announces that, based on the indications to date, the Group is expected to register in 2024 substantially higher profit compared to the previous year.

The increased profit is mainly attributed to the Group's investments in financial assets and, more specifically, investments in securities listed on the Cyprus Stock Exchange, including those of Hellenic Bank plc.
